

# R.F.MOTE

Introduces TiltWatch  
to reduce shipping damage to cabinets!

## ShockWatch Tilt Sensors:

- Reduce product damage and losses incurred during transportation
- Provide simple, cost-effective prevention of tilting
- Provide indisputable evidence of tilt
- Act as a visual deterrent to improper handling
- Affix directly to goods or packaging for clear visibility
- Ensure chain of accountability for all product handlers
- Alert recipient to inspect contents before acceptance
- Ensure quality of product from dock to dock
- Increase customer satisfaction and provide a visible marketing edge
